PROFESSIONAL EXPERIENCE

📁 Software Engineer – remote – 1 year

📁 Pinterest (through BairesDev outsourcing)

📅 Aug 2019 – present 📍 Maringá, PR, Brazil

We provide monitoring, alerting to improve Advertiser Interface & Growth systems. I have worked and developed:

- Time series dashboards for monitoring, alerting, and reporting.
- Google Chrome extension for internal purposes.

Main technologies: Python/Jupyter/Pandas, JavaScript/React, Kibana, SQL, OpenTSDB, and Phabricator (Git).

📁 Software Engineer – remote – 1 year

📁 BairesDev

📅 Aug 2019 – present 📍 Maringá, PR, Brazil

Work on screening processes for new employees and I also did some colleague mentorships.

Main technologies: Python

📁 Assistant Professor – 7 months

📁 State University of Maringá

📅 Apr 2019 – Oct 2019 📍 Maringá, PR, Brazil

I ministered the following subjects: Algorithms and Data Structures, Database, Multi and Hypermedia Systems, Algorithm Analysis, Graph Theory, and Object-Oriented Programming.

Main technologies: Python, C, MySQL, and Java.

📁 Tech Lead & Software Engineer – 4 years

📁 Seebot

📅 Oct 2015 – Sept 2019 📍 Maringá, PR, Brazil

We created a **smart traffic light (STL)** that can sense streets using cameras and act (open/close) autonomously. I worked:

- Leading software engineers to develop: STL hardware and software controllers, traffic simulators for traffic optimization, and dashboards.
- Designing hardware and software for traffic light controllers.
- Designing and developing a traffic simulator using **SUMO**. Our algorithm on this simulator had 200% to 400% waiting time optimization on light to medium vehicle traffic.

Main technologies: Python, Linux (Shell Script and Systemd), R and Git.

📁 Data Scientist – remote – 10 months

📁 Earlysec

📅 June 2018 – Mar 2019 📍 Maringá, PR, Brazil

We used Natural Language Processing techniques to filter, train, classify, and cluster social media messages.

Main technologies: Python/Sklearn, Java, Git, Elasticsearch, Kafka, Spark, and Linux.

INTEREST AREAS

Testing

EDUCATION

🎓 State University of Maringá

🎓 Master's degree in Computer Science

📅 2014–2016 📍 Maringá, PR, Brazil

Thesis: Algorithms based on Variable Neighborhood Search (VNS) meta-heuristic applied in the Bus Driver Schedule Problem.

🎓 Bachelor's degree in Computer Science

📅 2010 – 2013 📍 Maringá, PR, Brazil

Thesis: A genetic algorithm for the Feedback Arc Set Problem.

MAIN TECH SKILLS

</> Python
</> JavaScript
📄 SQL
🐧 Linux
</> C/C++

SCIENTIFIC PAPERS

📄 Journal of Universal Computer Science

📅 May 2017

Solving a Large Real-world Bus Driver Scheduling Problem with a Multi-assignment based Heuristic Algorithm.

📄 (PTBR) XLVIII SBPO - Simpósio Brasileiro de Pesquisa Operacional

📅 Sept 2016

Algoritmos baseados na meta-heurística VNS aplicados ao Problema de Escalonamento de Motoristas de Ônibus.

📄 17th International Conference on Enterprise Information Systems (ICEIS-2015)

📅 Jan 2015

Combining Heuristic and Utility Function for Fair Train Crew Rostering.
